Do You put up with Loose, Irritating Partial Dentures?
Does it bother you that those silver hooks show? Do your partials ever slip? Are they uncomfortable? Do they affect your eating? Your speech? Your smile? Your confidence?
 Today there is absolutely no reason to put up with those quality of life irritations.
 With recent dental advances there now are options that make available to you beautiful replacement teeth that won't cause any of the problems or embarrassments inherent with typical partials.
 To discover what ALL of your options are, please call to arrange a free personal consultation and evaluation. We will be happy to answer all of your questions and detail all of your options with no obligation whatsoever.

 Consumer Horticulturist

APRIL HOME (Indoor plants and activities)

Start seeds of warm-season plants, including tomatoes, peppers, eggplant, marigolds, zinnias and petunias, indoors for transplanting later to the garden.
 Harden off transplants started earlier in spring before planting outdoors — gradually expose the young plants to outdoor conditions of wind, brighter sunlight and lower moisture.
 Apply fertilizer to houseplants according to label directions as days grow brighter and longer and new growth begins. Foliage plants require relatively high nitrogen fertilizer, while blooming plants thrive on formulations that are higher in phosphorus.

Keep Easter lily in a bright, cool location, out of direct sunlight. Water as soil begins to dry. The yellow pollen-bearing anthers inside the flower can be removed by pinching to prevent staining of the petals.
YARD (Lawns, woody ornamentals and fruits)
 Plant a tree in celebration of National Arbor Day, April 25. Bare-root stock should be planted before new top growth begins. Balled- and burlapped and containerized stock can still be planted later in spring.

Fertilize woody plants before new growth begins. Two pounds of actual nitrogen per 1,000 square feet should be sufficient.
 Complete pruning chores, removing dead and injured branches first.
 Apply a prebloom, multi-purpose orchard spray to fruit trees.

Remove winter coverings from roses, but keep mulch nearby for protection from late freezes. Prune and fertilize as needed.
 Apply pre-emergent herbicide to control crabgrass in lawns. Approximate dates of application are April 1 to April 20 in southern Indiana and April 21 to May 10 in northern Indiana.

GARDEN (Flowers, vegetables and small fruits)

Plant seeds of cool-season crops directly in the garden as soon as soil dries enough to be worked. When squeezed, soil should crumble instead of forming a ball. Cool-season crops that can be direct-seeded include peas, lettuce, spinach, carrots, beets, turnips, parsnips and Swiss chard.
 Plant transplants of cool-season crops, such as broccoli, cauliflower, cabbage, Brussels sprouts, kohlrabi and onions.

Plant or transplant asparagus and rhubarb crowns. For best plant establishment, do not harvest until the third year after planting.
 Plant sections of certified, disease-free potato "seed" tubers.
 Allow foliage of spring-flowering bulbs to remain in place after blooms fade. Leaves manufacture the food reserves, which are then stored in the bulb for a repeat showing next year.
 Plant hardy perennials, such as daylilies and delphiniums.
 Start tuberous begonias and caladiums indoors for transplanting to garden later.
 Remove winter mulch from strawberries, but keep mulch handy in case late frosts are predicted and to help keep weeds under control.
 Plant or transplant strawberries, raspberries and other small fruit.
 Prune grape vines to remove dead or weakened limbs, and repair support trellises as needed.

Real Estate Transfers

Todd M. Combs and Loretta L. Combs to Andrew M. Combs, Quit Claim.
 Bad Lizard Inc. to Gregory S. Britt and Michelle S. Britt, Corporate Deed.
